

## WORKSHOP SUMMARY

### CONSIDER ALPACAS !

#### WHAT TO DO WITH YOUR LAND?

- Alpacas are spearheading a revolution amongst people who never even thought they were farmers, allowing them to undertake a rewarding and fulfilling activity with little or no prior agricultural experience.
- Often people who have stepped out of the 'rat race' looking for a less stressful life will typically buy 'a place in the country' with some land with the idea of undertaking some sort of farming enterprise.
- Compared to other more traditional livestock such as sheep, pigs, and goats, Alpacas are a new and growing feature on the British agriculture scene particularly suited to the smallholder or lifestyle farmer.
- AzSu Alpacas has been down this road. Come and benefit from our experience. Attend one of our introductory days when we will tell you what you need to know to get started with Alpacas.
- Bring a map of your own land with existing buildings shown on it. We will then discuss if it is suitable for Alpacas.
